It pains me to mark this as not recommended, but we have to be honest and look at the current state no matter our hopes or the hard effort V good intentions of some of the devs as it may be.

The game is in sort of an unfinished state..... The initial release was ok while lacking a lot of depth and content.... then the overhaul came (which was much anticipated i might add) for a bunch of much needed stuff... thing is.... it was unfinished and quite broken.... so, to sum up, the current state of the game is broken..... might have game breaking bugs and completely broken quest lines left up to chance, among other issues.

Most of us still hold hope and trust in the ideals the dev team had, wishing this game will see completion at some point..... but it is been quite a while without updates and we have to base this on the current state nonetheless.... so even if it stings a bit, i wouldn't recommend buying this as it is..... AT ALL.

Will edit if its updated
