// how can i copy datas? A: There is no option in step 7 to copy from one multi-select list to another. If you are trying to do something like this you'll have to build a list of all your chosen values in a single multi-select list, then copy this list. You'll need to copy all the records one by one. If you are using variant, you will have to loop through the recordset and copy the data one by one. If you are using a combobox, you'll have to loop through all the records and copy the values. Lawyers representing Jussie Smollett say the "Empire" actor was attacked after responding to a phone call to his apartment while he was wearing "MAGA" hat. Attorney Gloria Schmidt and Abideen Almqvist, who represent Smollett, said the attack occurred in the early hours of January 29, 2020. "In the early morning hours of Jan. 29, Jussie was physically attacked by two people who shouted racist and anti-gay slurs and beat him, leaving him battered and bruised," lawyers said in a statement. The pair also said, "Jussie is doing well and will be back on the set of Empire soon." According to Schmidt and Almqvist, Smollett turned down a plea deal last week that would have required him to complete community service, after Chicago prosecutors charged him with filing a false police report. ADVERTISEMENT "We reached an agreement that was wholly satisfactory to the state," said prosecutor Joe Magats. "This disposition speaks loudly and clearly that this office will continue to hold accountable anyone who lies to law enforcement and diverts the attention of police from real crimes to fake ones." Smollett said in a statement released last week that the "attackers" "took advantage of a racist and homophobic environment that still exists in some parts of this country." Chicago police said Smollett staged the attack as payback against Trump supporters, according to authorities. Charges against Smollett were dropped after Cook County prosecutors said they had "probable cause" that he had committed the alleged crime.#-*- coding: utf-8 -*- from __future__ import unicode_literals from django.db 82157476af
